

Connecting People with Technology

Technical Outsourcing Services

Utilizing outside resources to help you accomplish your goals faster is a smart business decision. Outsourcing technical labor is a cost effective way to minimize staffing costs and maximize productivity. We can provide highly skilled labor to cover a broad range of functions and complete specific projects or tasks such as:

- Deploying
- Migrating
- Integrating
- Installing/upgrading software
- Installing additional external devices
- Connecting/testing newly installed equipment
- Installing device drivers
- Performing modifications
- Testing existing systems
- Disconnecting idle systems
- Packing, moving, unpacking

Benefits

- Reduces equipment downtime
- Frees internal staff to maintain core business functions
- Provides on-site support staff for scheduled projects
- Performs services with vendor-trained and certified technicians
- Details documentation of services
- Reduces and controls operating costs
- Provides multi-skill levels for service

Reasons you would use these services:

- Your technology staff frequently works long hours because they are short-handed.
- Additional staff is needed to handle work load, but the budget cannot cover costs associated with a full-time, permanent staff person.
- Staff needed with the expertise and experience to complete all tasks.
- Current staff members are struggling to balance regular duties and handle all network administration issues.
- You are not a large enough company to have an employee entirely dedicated to network administration, not even on a part-time basis.
- You need to free up financial capital for investment in activities where your organization can generate the highest returns.
