

Connecting People with Technology

Technology Disposal Services

Effectively minimize the costs associated with the disposal of idle, unused, end-of-lease or failed IT equipment. This program provides you with staff to handle the entire process of preparing and handling the materials to be destroyed. A detailed database of the assets to be disposed and the method of disposal are all documented for you.

Did you know?

- E-waste contains hazardous materials including: lead, mercury, arsenic, cadmium, phosphorus powders and barium, just to name a few.
- The U.S. Environmental Protection Agency (EPA) estimates over 250 million computers will become obsolete in the next five years. And, 75% of all obsolete computers are currently in storage.
- An estimated 80% of the computer assets collected in the U.S. for recycling are sent to China, India and Pakistan where enforcement of safe environmental standards are non-existent.
- Erb's partners with a local business who fully recycles the e-waste it receives so you can feel secure in knowing where your assets have gone.

Go green.

**Recycle your old
equipment today.**

Benefits

- Complies with state of Iowa and EPA regulations for Cathode Ray Tubes (CRTs).
- Environmentally correct method of disposal for your technology assets prevents lead contamination from CRTs and other hazardous materials.
- Recycles under "no landfill policy," where all components of the equipment are recycled.
- Hard drives are pulverized to ensure security.
- Provides detailed documentation of assets disposed and Document of Destruction/Recycling.
- Utilizes single point of contact.
- Frees internal staff to maintain core business functions.
