Winning the War Against Spam and Other Security Risks

Today, mail servers and users are under siege from malicious viruses and the exponential growth of spam. **As much as 88% of all email may be categorized as spam, phishing scams, viruses or directory harvest attacks.** That comes to companies in an estimated \$25 billion price tag.

DoubleCheck helps you manage email, improve productivity and reduce costs. The DoubleCheck Email Manager with McAfee Antivirus is a gateway email appliance that checks every email for spam and viruses and stops them before they reach your mail server, thus reducing the wear and tear on your server.

DoubleCheck scores every message for spam based on 800+ globally-defined heuristic rules, Bayesian Classification, automatic white lists, and Real-Time Black Hole List and other spam-stopping techniques. You customize scoring thresholds and custom lists to maintain control over clean, tagged, quarantined or deleted messages.

Customized reports track statistics for total email traffic, spam, viruses, deleted messages, email logs, top spam senders and many others.

By reducing the amount of time required for employees to maintain their email box and by preventing harmful and costly email from entering your environment, DoubleCheck is reported to reach its return on investment in less than one year.

Erb's Network Engineers and Account Executives will work with you to install the DoubleCheck solution and will provide monthly on-site scheduled service for your choice of either three months or one year.

Double Check Product has a 3 year warranty. An Annual Maintenance contract provides for software and console updates with phone support.

Benefits

- Protect network, users and reputation
- Proactively manage email based on statistics, events, data and reporting
- Significantly reduce network traffic
- Improve productivity
- Eliminate unauthorized use of server
- Reduce administrative costs
- Reduce likelihood of virus attack
- Improve knowledge of virus traffic, type, senders, recipients and log history

"The DoubleCheck product makes your job and life a whole lot better, no matter how many users you have."
